## PHOENIX WATER PORTFOLIO

Phoenix has been designated by the State as having a 100-year assured water supply. To prepare for drought, we have developed a diverse portfolio of water supplies that includes Salt, Verde, and Colorado River water, groundwater reserves, and reclaimed wastewater for non-potable purposes. Phoenix currently uses only around half of its Salt & Verde River water supplies, and around 2/3 of its Colorado River water supplies. This creates a buffer between supplies and demand that Phoenix can rely on during times of drought and surface water shortage.
