

# Lithium-Ion Battery Fire Investigations

## April 2026

Year to date, there have been 20 fires investigated, where a lithium-ion battery was found in the area of origin. Micro Mobility make up the highest number of incidents year-to-date.

### Type of Device Powered

**Name of Product:**  
Shenzhen Baihang  
VEEKTO MX Mini Power Bank

**Hazard:**  
The lithium-ion battery in the recalled power banks can overheat and ignite, posing fire and burn hazards to consumers.

**Remedy:**  
Consumers should immediately stop using

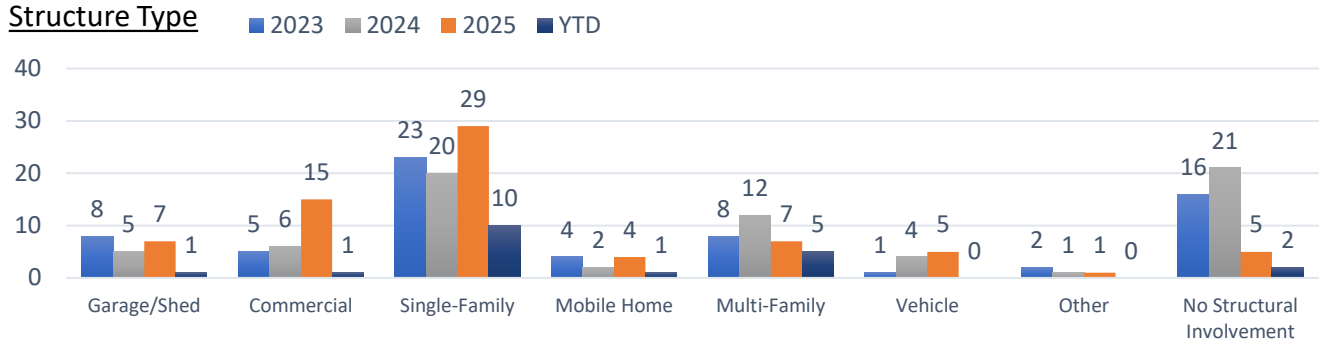

**Recall Date:**  
April 9, 2026

**Units:**  
About 8,000

U.S. Consumer Product Safety Commission

### Structure Type

## FIRES AND EMERGENCIES

If a battery overheats or you notice an odor, change in shape/color, leaking, or odd noises from a device, stop using immediately. If safe to do so, move the device away from anything that can catch fire and call 911.

Lithium-Ion batteries are known to unexpectedly re-ignite minutes, hours, and even days after all visible fire has been put out.

If you observe a lithium-ion battery fire, leave the area, CLOSE the door, and call 911 immediately.

Water and fire extinguishers do not work on lithium-ion battery fires.
