FIRES AND EMERGENCIES

If a battery overheats or you notice an odor, change in shape/color, leaking, or odd noises from a device, stop using immediately. If safe to do so, move the device away from anything that can catch fire and call 911.

Lithium-Ion batteries are known to unexpectedly re-ignite minutes, hours, and even days after all visible fire has been put out.

If you observe a lithium-ion battery fire, leave the area, CLOSE the door, and call 911 immediately.

Water and fire extinguishers do not work on lithium-ion battery fires.
