

City of Phoenix
PLANNING AND DEVELOPMENT DEPARTMENT

Staff Report: Z-65-20-6
June 28, 2021

[Camelback East Village Planning Committee Meeting Date](#) July 6, 2021
[Planning Commission Hearing Date](#) August 5, 2021

Request From: [P-1](#) (Parking District – Passenger Automobile Parking, Limited) (1.38 acres) and [C-2](#) (Intermediate Commercial District) (1.85 acres)

Request To: [PUD](#) (3.23 acres)

Proposed Use Multifamily residential development

Location Approximately 180 feet south of the southeast corner of 7th Street and Palo Verde Lane

Owner Phoenix 7th Street, LLC, SW Behavioral Services, and 5727 N 7th Street, LLC

Applicant/Representative ORB Architecture, LLC

Staff Recommendation Approval, subject to stipulations

<u>General Plan Conformity</u>			
<u>General Plan Land Use Map Designation</u>		Commercial	
<u>Street Map Classification</u>	7th Street	Major Arterial	40-foot east half street
	8th Place	Local	30-foot west half street
<p>CONNECT PEOPLE AND PLACES CORE VALUE; OPPORTUNITY SITES; LAND USE PRINCIPLE: Promote and encourage compatible development and redevelopment with a mix of housing types in neighborhoods close to employment centers, commercial areas, and where transit or transportation alternatives exist.</p> <p>The proposal seeks to convert a site that currently houses an office building and an underutilized surface parking lot into a multifamily residential development, which will provide more housing options for residents in the area and will support the existing commercial corridor along 7th Street.</p>			

CONNECT PEOPLE AND PLACES CORE VALUE; COMPLETE STREETS; DESIGN PRINCIPLE: In order to balance a more sustainable transportation system, development should be designed to include increased amenities for transit, pedestrian and bicyclists such as shade, water, seating, bus shelters, wider sidewalks, bike racks, pedestrian scale lighting and way-finding.

This PUD seeks to improve the pedestrian environment along both its street frontages with larger separation between the sidewalk and the back of curb to better buffer from vehicular traffic. It also includes standards for robust tree plantings to provide shade for pedestrians, as well as human-scale building design along the streets for an improved interaction between pedestrians and the build environment.

CELEBRATE OUR DIVERSE COMMUNITIES CORE VALUE; CERTAINTY & CHARACTER; LAND USE PRINCIPLE: Protect and enhance the character of each neighborhood and its various housing lifestyles through new development that is compatible in scale, design, and appearance.

The proposed PUD incorporates design elements from the surrounding neighborhood and sets forth standards to ensure that the increase in density of the site is mitigated by an appropriate building mass transition from both street frontages. The primary frontage on a major arterial street features a modern urban design that protects pedestrians from the high volumes of traffic. The secondary frontage on a local street is characterized by walk-up townhome units that are separated from the overall multifamily development and are thus compatible in scale and character to the adjacent neighborhood to the east. Further, the existing building on the site is four stories tall, with a maximum height of 48 feet, so the proposed development will improve the height transition from the public rights-of-way.

BUILD THE SUSTAINABLE DESERT CITY CORE VALUE; TREE AND SHADE; DESIGN PRINCIPLE: New development should minimize surface parking areas and provide an abundance of shade through either trees or structures on any planned parking areas.

The proposed PUD narrative includes landscaping standards that exceed those set forth in the Zoning Ordinance to provide robust tree shade coverage on the pedestrian realm. Further, the PUD does not permit surface parking areas and will provide all required parking within a fully enclosed garage that is interior to the site.

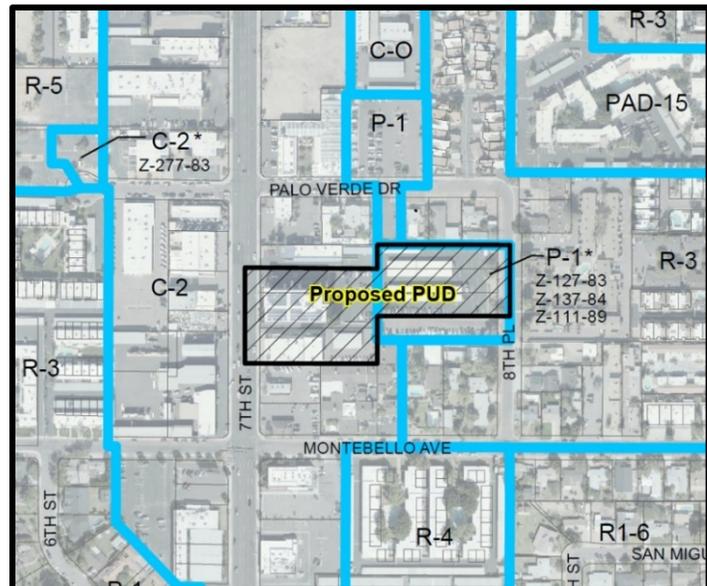

Applicable Plan, Overlays, and Initiatives
<u>Housing Phoenix Plan</u> – See Background Item No. 11.
<u>Tree and Shade Master Plan</u> – See Background Item No. 12.
<u>Complete Streets Guiding Principles</u> – See Background Item No. 13.
<u>Comprehensive Bicycle Master Plan</u> – See Background Item No. 14.
<u>Zero Waste PHX</u> – See Background Item No. 15.

Surrounding Land Uses/Zoning		
	<u>Land Use</u>	<u>Zoning</u>
On Site	Office, parking lot	P-1, C-2
North	Multifamily residences, retail shops, restaurants	P-1, R-3, C-2
South	Office, behavioral health facility, parking lot, multifamily residences	P-1, R-3, C-2
East	Behavioral health facility, multifamily residences, parking	R-3, C-2, P-1
West	Lumber yard, retail, equipment rental	C-2

Background/Issues/Analysis

SUBJECT SITE

1. This request is to rezone a 3.23-acre site located approximately 180 feet south of the southeast corner of 7th Street and Palo Verde Lane from P-1 (Parking District – Passenger Automobile Parking, Limited) (1.38 acres) and C-2 (Intermediate Commercial District) (1.85 acres) to PUD (Planned Unit Development) to allow multifamily residential.

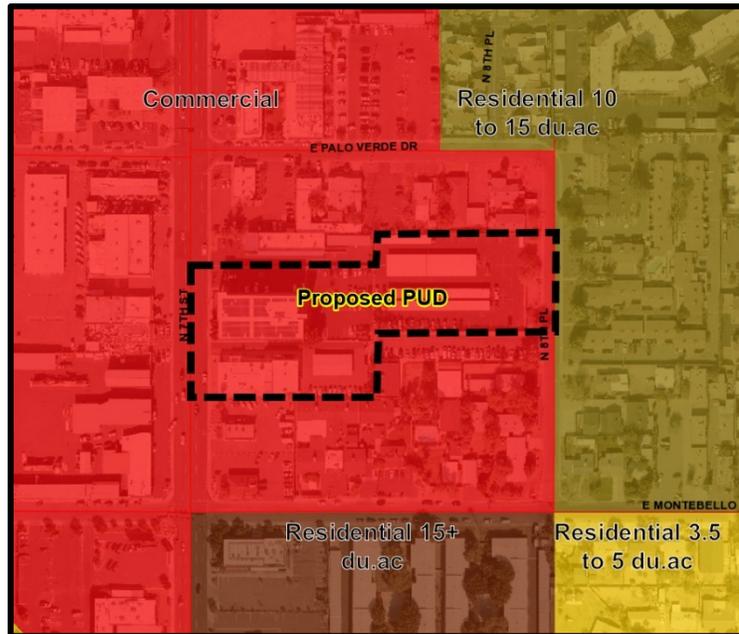

Zoning Map

Source: City of Phoenix Planning and Development Department

2. The site has a General Plan Land Use Map designation of Commercial. This same designation extends to the north, south, and west of the site. To the east of the subject site, the designation is Residential 10 to 15 dwelling units per acre.

The PUD is not consistent with the Commercial General Plan Land Use Map designation, as the proposed density exceeds that which is permitted for multifamily developments in a commercial zoning district. However, a General Plan Amendment is not needed as the site does not exceed 10 acres in size.

General Plan Land Use Map
Source: City of Phoenix Planning and Development Department

EXISTING CONDITIONS & SURROUNDING ZONING

3. The subject site is currently occupied by a four-story office building and a one to two story office building zoned C-2 (Intermediate Commercial District); and a surface parking lot which is zoned P-1 (Parking District – Passenger Automobile Parking, Limited). The surrounding zoning and land uses are as follows:

NORTH

To the north, along Palo Verde Drive, there are a variety of existing uses. The western portion of the street is occupied by retail businesses and offices that are zoned C-2 (Intermediate Commercial District). Mid-block, there is a surface parking lot zoned P-1 (Parking District – Passenger Automobile Parking, Limited), and to the east, closer to 8th Place, are single-story apartment buildings zoned R-3 (Multifamily Residence District)

SOUTH

South of the subject site is a similar mixture of zoning districts. Immediately south of the site, on the 8th Place side, is a surface parking lot zoned P-1 (Parking District – Passenger Automobile Parking, Limited) and, just to the south, single-story apartment buildings zoned R-3 (Multifamily Residence District). Along 7th Street, south of the subject site, are office and retail buildings zoned C-2 (Intermediate Commercial District).

EAST

East of the site, across 8th place, are single-story apartment buildings zoned R-3 (Multifamily Residence District).

WEST

West of the site, across 7th Street, are retail businesses, including a lumber yard, appliance store, and equipment rental facility zoned C-2 (Intermediate Commercial District).

Existing Site Conditions
Source: Google Street View

The proposed PUD is consistent with the surrounding land uses and zoning districts and will provide additional housing options in the community. Further, the proposal is consistent with the scale of the existing building on the site.

PROPOSAL

4. The proposal was developed utilizing the PUD zoning designation. The Planned Unit Development (PUD) is intended to create a built environment that is superior to that produced by conventional zoning districts and design guidelines. Using a collaborative and comprehensive approach, an applicant authors and proposes standards and guidelines that are tailored to the context of a site on a case by case basis. Where the PUD Development Narrative is silent on a requirement, the applicable Zoning Ordinance provisions will be applied.
5. The development standards contained within the PUD were developed to account for the unique configuration of the lot, which has two street frontages. The primary frontage is along 7th Street, which is classified as a major arterial street in the City of Phoenix Street Classification Map. The secondary frontage is to the east on 8th Place, which is a local street. These two streets have very different streetscapes and levels of traffic volume, and the standards set forth in this PUD are intended to maximize the use of the site while providing a transition between a major arterial street and local street.
6. The PUD proposes development standards designed to accommodate a five-story multifamily residential building with a maximum height of 56 feet and a maximum of 260 dwelling units, at a maximum total density of 80.5 dwelling units per gross acre. Per the conceptual site plan included in the PUD narrative, resident and guest parking spaces will be located within a fully enclosed parking garage on the ground floor of the building, with the main entry driveway located on 7th Street. This configuration will reduce the number of existing driveways along 7th Street from two to a single point of ingress and egress. The main parking garage will not have any vehicular access from 8th Place, where six individual townhome units will have their own access via private driveways and garages.

Conceptual Ground Floor Site Plan
Source: ORB Architecture

The standards contained in this PUD are based on the Zoning Ordinance standards for the Walkable Urban (WU) Code, Transect T5:5, with modifications to account for the unique nature of the site. Below is a summary of the proposed standards for the subject site as described in the attached PUD narrative date stamped June 4, 2021.

Standard	Proposed
<i>Density</i>	80.5 du/ac
<i>Building Height</i>	56 feet maximum 27 feet maximum within 40 feet of property line along 8th Place (townhouses) 37 feet maximum within 40 feet of property line along 7th Street
<i>Building Setbacks</i>	
Primary Frontage (7th Street)	20 feet maximum
Side Lot Lines	5 feet minimum
Secondary Frontage (8th Place)	13 feet minimum
<i>Maximum Lot Coverage</i>	75 percent maximum
<i>Parking Setbacks</i>	
Primary Frontage (7th Street)	30 feet minimum or behind building
Side Lot Lines	5 feet minimum or behind building
Secondary Frontage (8th Place)	5 feet minimum or behind building
Driveway Widths (8th Place)	Maximum 20 feet
<i>Parking</i>	
Residents	1.3 spaces per studio unit 1.5 spaces per 1- and 2-bedroom units 2 spaces per 3- or more bedroom units
Loading Spaces	Minimum 1 loading space
Bicycle Residential	Minimum 0.25 spaces per unit (maximum 50 spaces). 50 spaces minimum secured within bike repair room. 8 spaces minimum near primary building entries.
Non-Residential	Per WU Code T5:5 standards
<i>Frontage Types</i>	
Primary and Secondary Frontages	Per Section 1305.B.1
Entry Primary Frontage	Minimum 3 entries along primary frontage
Entry Secondary Frontage	No common entries permitted. Entries along this frontage are for individual private residences.

This PUD proposes a mixture of height restrictions along both primary and secondary street frontages to break up the overall mass of the building while creating a pedestrian environment that is at the human scale. Along its primary frontage on 7th Street, the building will have a maximum height of 37 feet within 40 feet of the property line. Along the secondary frontage, on 8th Place, the maximum building height shall be 27 feet within 40 feet of the property line, where the individual residential townhome units will be located. This staggered height approach along the rights-of-way will help minimize the impact of the overall building height on the surrounding neighborhood.

Conceptual Site Plan
Source: ORB Architecture

LANDSCAPE STANDARDS

7. The PUD sets forth enhanced landscape standards that aim to provide a superior pedestrian environment, with an emphasized focus on the 7th Street frontage. Due to the high intensity of vehicular traffic on 7th Street, a minimum 8-foot-wide landscape strip shall be provided between the sidewalk and back of curb to buffer pedestrians from the adjacent street. This landscape area shall be planted with 30 percent minimum three-inch caliper trees, and the rest minimum two-inch caliper trees. A minimum of 75 percent shade at tree maturity shall be provided along the sidewalk to ensure a thermally comfortable pedestrian environment, as well as 75 percent live groundcover of all landscape areas to help reduce the urban heat island effect.

SIGNAGE STANDARDS

8. The proposed signage standards within this PUD shall conform with the standards set forth in Section 1308 of the Zoning Ordinance, with one modification for projecting signs. Due to the project's location on a major arterial street, where there are a high volume of traffic travelling at high speeds, and the distance of the

building from the street, the PUD proposes a maximum projecting sign area of 60 square feet. Section 1308 of the Zoning Ordinance limits projecting signs to 6 square feet, so the proposal is ten times larger than what is allowed by code. Staff is not supportive of the proposed projecting signage size and is recommending a modification to the PUD narrative to reduce the maximum allowed sign to 30 square feet, which is consistent with signage standards approved through the Zoning Adjustment Hearing Officer process for similar developments in the city. This is addressed in Stipulation No. 1.d.

DESIGN GUIDELINES

9. The PUD contains a variety of design guidelines addressing building facades, which are intended to enhance the visual interest of the structures, provide a pedestrian scale environment, and provide a high-quality design that draws inspiration from the surrounding neighborhood. Guidelines include architectural embellishments such as textural changes, pilasters, offsets, overhang canopies, among others; enhanced building materials which include horizontal wood siding (this pays homage to the local lumber business located nearby) and vertical features that create shade and visual interest, and various architectural accents.

Conceptual Renderings

Source: ORB Architecture

Note: This rendering does not accurately reflect the proposed streetscape sidewalk standards for 7th Street.

Further architectural enhancement and appropriate building massing is required by the base zoning district that this PUD seeks to follow, which is the T5:5 district of the Walkable Urban Code. This is a form-based code that emphasizes the importance of a building's relationship to the pedestrian realm and therefore sets forth design standards that exceed other conventional zoning districts.

10. Staff's final review of the hearing draft of the proposed PUD development narrative identified two minor corrections that are needed for consistency and clarity. The first is on page 10 of the narrative, in the Development Standards Table, under Parking

Setbacks. The 8th Place frontage is being referred to as a “Rear Lot Line.” To remain consistent with the terminology throughout the narrative, staff is recommending that this be changed to “Secondary Frontage,” which is addressed in Stipulation No. 1.b. The second correction is on page 12, where the narrative refers to Section 1309 of the Zoning Ordinance for signage standards. The correct section is 1308, a correction that is noted in Stipulation No. 1.c.

AREA PLANS, OVERLAY DISTRICTS, AND INITIATIVES

11. [Housing Phoenix Plan](#)

In June 2020, the Phoenix City Council approved the Housing Phoenix Plan. This Plan contains policy initiatives for the development and preservation of housing with a vision of creating a stronger and more vibrant Phoenix through increased housing options for residents at all income levels and family sizes. Phoenix’s rapid population growth and housing underproduction has led to a need for over 163,000 new housing units. Current shortages of housing supply relative to demand are a primary reason why housing costs are increasing. The proposed development supports the Plan’s goal of preserving or creating 50,000 housing units by 2030 by providing an opportunity for high density residential development.

12. [Tree and Shade Master Plan](#)

The Tree and Shade Master Plan has a goal of treating the urban forest as infrastructure to ensure that trees are an integral part of the city’s planning and development process. By investing in trees and the urban forest, the city can reduce its carbon footprint, decrease energy costs, reduce storm water runoff, increase biodiversity, address the urban heat island effect, clean the air, and increase property values. In addition, trees can help to create walkable streets and vibrant pedestrian places. The proposed PUD narrative includes standards for enhanced streetscape landscaping, especially along 7th Street, where a wide landscape buffer, with large-caliper shade trees, will be provided between the sidewalk and back of curb. Additional large caliper trees will be planted between the sidewalk and the building, as well as along the secondary street frontage, to provide a minimum of 75 percent shade along all pedestrian pathways at maturity.

13. [Complete Streets Guiding Principles](#)

In 2014, the City of Phoenix City Council adopted the Complete Streets Guiding Principles. The principles are intended to promote improvements that provide an accessible, safe, connected transportation system to include all modes, such as bicycles, pedestrians, transit, and vehicles. The proposed PUD narrative sets forth development and landscape standards that will provide a safe pedestrian environment along both of its street frontages. Further, the development will provide bicycle amenities such as bike lockers, racks, and a repair station.

14. [Comprehensive Bicycle Master Plan](#)

The City of Phoenix adopted the Comprehensive Bicycle Master Plan in 2014 to guide the development of its bikeway system and supportive infrastructure. The

Comprehensive Bicycle Master Plan supports options for both short- and long-term bicycle parking as a means of promoting bicyclist traffic to a variety of destinations. The proposal incorporates standards for bicycle parking for residents and guests, and a bicycle repair station.

15. **Zero Waste PHX**

The City of Phoenix is committed to its waste diversion efforts and has set a goal to become a zero-waste city, as part of the city's overall 2050 Environmental Sustainability Goals. One of the ways Phoenix can achieve this is to improve and Section 716 of the Phoenix Zoning Ordinance expand its recycling and other waste diversion programs. Section 716 of the Phoenix Zoning Ordinance establishes standards to encourage the provision of recycling containers for multifamily, commercial and mixed-use developments meeting certain criteria. The proposed development will provide recycling areas for residents.

COMMUNITY INPUT SUMMARY

16. At the time this staff report was written, staff received 11 public inquiry letters with questions about the details of the development, and concerns regarding the height, density, and traffic circulation and generation. Some of the community members who submitted these concerns later sent in one letter of support as a group after having worked with the applicant to address their comments.

INTERDEPARTMENTAL COMMENTS

17. **Fire Prevention Division, Fire Department**

Fire Prevention does not anticipate problems with the referenced case. However, the site and or buildings shall comply with the 2018 IFC with Phoenix Amendments. Specifically, Fire Apparatus Access from CH 5 for turning radius, turnarounds, and dead ends. Currently the water supply (gpm and psi) for the referenced case is unknown. The water supply is required to meet fire flow as defined by Appendix B of the 2018 IFC with Phoenix Amendments.

18. **Floodplain Management Division, Public Works Department**

Floodplain Management determined that this parcel is not in a Special Flood Hazard Area (SFHA), but is located in a Shaded Zone X, on panel 1740 L of the Flood Insurance Rate Maps (FIRM) dated October 16, 2013.

19. **Public Transit Department**

The Public Transit Department has required that clearly defined, accessible pedestrian pathways be provided to connect all main site elements and public sidewalks, and, where they intersect drive aisles, they be constructed of materials that visually contrast with parking surfaces. The department further required that all pedestrian sidewalks be shaded to 75 percent at tree maturity. These standards have been incorporated into the PUD narrative as regulatory standards. The department also required that all cross-access agreements incorporate a pedestrian pathway, which is addressed in Stipulation No. 2.

20. **Street Transportation Department**

The Street Transportation Department has required that the developer dedicate a 10-foot-wide sidewalk easement along the east side of 7th Street, submit a traffic impact statement prior to preliminary approval of plans, and that the developer construct all streets within and adjacent to the development. These improvements shall comply with all ADA accessibility guidelines. These requirements are addressed in Stipulation Nos. 3, 4 and 5.

21. **Archaeology**

The site is not designated as archaeologically sensitive. However, should archaeological materials be encountered during construction, the developer shall immediately cease all ground-disturbing activities within a 33-foot radius of the discovery, notify the City Archaeologist, and allow time for the Archaeology Office to properly assess the materials. This is addressed in Stipulation No. 6.

22. Development and use of the site is subject to all applicable codes and ordinances. Zoning approval does not negate other ordinance requirements. Other formal actions such as, but not limited to, zoning adjustments and abandonments, may be required.

Findings

1. The proposed PUD will redevelop an office and surface parking lot to provide a high quality multifamily residential development which will help alleviate the housing shortage in Phoenix.
2. The proposed land use intensity is appropriate at this location along a major arterial street and in close proximity to a variety of commercial uses.
3. The proposed PUD sets forth building height standards that provide a transition along both of its frontages to create a pedestrian scale environment.

Stipulations

1. An updated Development Narrative for the Broadstone on 7th PUD reflecting the changes approved through this request shall be submitted to the Planning and Development Department within 30 days of City Council approval of this request. The updated Development Narrative shall be consistent with the Development Narrative date stamped June 4, 2021, as modified by the following stipulations:
 - a. Front cover: Revise the submittal date information on the bottom to add the following: Hearing draft submittal: June 4, 2021; City Council adopted: [Add adoption date].
 - b. Page 10, Development Standards Table, Parking Setbacks: Please replace "Rear Lot Line (8th Place)" with "Secondary Frontage (8th Place)."

- c. Page 12, Signage Standards: Replace “Walkable Urban Code Section 1309” with “Walkable Urban Code Section 1308” to reference the correct Zoning Ordinance section.
 - d. Page 12, Signage Standards Table, Projecting Sign: Revise the maximum sign area to 30 square feet.
2. All cross-access agreements shall incorporate a pedestrian pathway, as approved by the Planning and Development Department.
 3. The developer shall dedicate a 10-foot-wide sidewalk easement on the east side of 7th Street, as approved by the Planning and Development Department.
 4. The applicant shall submit a traffic statement to the City for this development. No preliminary approval of plans shall be granted until the study is reviewed and approved by the City. Contact the Street Transportation Department to set up a meeting to discuss the requirements of the study. Upon completion of the TIS the developer shall submit the completed TIS to the Planning and Development Department counter with instruction to forward the study to the Street Transportation Department, Development Coordination Section.
 5. The developer shall construct all streets within and adjacent to the development with paving, curb, gutter, sidewalk, curb ramps, streetlights, landscaping and other incidentals, as per plans approved by the Planning and Development Department. All improvements shall comply with the current ADA Guidelines.
 6. In the event archaeological materials are encountered during construction, the developer shall immediately cease all ground-disturbing activities within a 33-foot radius of the discovery, notify the City Archaeologist, and allow time for the Archaeology Office to properly assess the materials.

Subject: Re: 5727 N. 7th St PUD

George,
I had planned to speak tomorrow but I am out of town unexpectedly and won't be back until Wednesday. If you would like to submit my comments in my absence, please do so. If this is the first of two meetings with the Camelback East Village, I can make comments at the next one.

Dear Members of the Camelback East Village Committee:

I would like to express my appreciation and gratitude to the developer and Withey Morris for including our neighborhood group in the early and ongoing development process of this proposed PUD.

This should be the template EVERY developer should execute when proposing a zoning change within close proximity to a residential area. Because there was open dialogue at the beginning, we were able to collaborate on a design that is supportive of what a PUD is supposed to be....a superior use of the land.

We believe that the architectural design, setbacks and detached sidewalks will create an important and positive impact to 7th Street.

As a result, we would like to express our support for this project.

Sincerely,

*Mary L. Crozier
President
North Central Phoenix Homeowners Association*

Subject: RE: Application Z-65-20

Good afternoon,

I checked our records and the only permits I see for the Southwest Behavioral Health building reference repair to fire damage. As I stated earlier, the earlier Broadstone apartments have yet to be approved, so building permits cannot be issued for their development.

I do have an update regarding meeting dates. This case is scheduled to go before the Camelback East Village Planning Committee on March 2, 2021 for an informational presentation. This will be purely for informational purposes and for the applicant to receive feedback from the committee and from members of the community to incorporate into their development narrative. The agenda, with instructions on how to participate, will be posted [here](#) two weeks before the meeting date.

The applicant has not yet provided a second submittal. The narrative I linked in my original email is still the only one we have on file.

Please let me know if you have further questions.

Best regards,

Sofia Mastikhina, CNU-A

Sofia, thanks for your earlier response. There seems to be activity at the site particularly at the Southwest Behavioral Health building. Does that mean some approval has already been granted. That seems to contradict your statement about no meetings dates nor times have been set.

Can you please clarify? Additionally, has the company provided a second application that can be reviewed ahead of any Village Planning Committee, Planning Commission or City Council date?

Subject: RE: Application Z-65-20

Good afternoon,

This PUD application has recently completed its first round of staff review (approximately 3-4 weeks). We are now waiting on a resubmittal of the development narrative, with staff's comments incorporated. Once we receive the resubmittal, it will be another 2-3 weeks of staff review, and subsequent resubmittals and reviews will occur as needed until staff determined that the narrative is ready for hearings. At this point, we will provide the applicant with their Village Planning Committee, Planning Commission, and City Council dates, which will be posted on the site. As this is a PUD request, not a conventional rezoning request, the applicant will also be required to hold an informational presentation at the Village Planning Committee, prior to coming back for a recommendation and a vote. You can find more information regarding the processes and timelines of a PUD request here: https://www.phoenix.gov/pddsites/Documents/PZ/pdd_pz_pdf_00590.pdf.

A copy of the applicant's first submittal can be accessed here:
<https://www.phoenix.gov/pddsites/Documents/PZ/Z-65-20n.pdf>.

At this time, no meeting dates have been set.

Please let me know if you have further questions.

Best regards,

Sofia Mastikhina, CNU-A

Sofia, the ORB Architecture firm has identified you as the Planner assigned to this case. In their letter from last month, they have indicated no meetings nor hearings are currently scheduled on the project which involves property located at 5717, 5727 & 5733 N. 7th Street. They are wanting to rezone the area for a Planned Unit Development district with development of "260 high-end residential units".

Can you provide us an update on the project and the tentative timing for this planned change? You can reach me at 602-999-6803.

Subject: Broadstone on 7th

Hello, Rich

Thank you for the information on the proposed project on North 7th Street. I am a homeowner behind the Culinary Dropout parking lot. As you are aware our neighborhood association and the residents of our neighborhood are very aware of the development and environmental impact issues and new residential or commercial businesses will cause.

I have a few questions -

Our backyard view of Piestwa Peak will be directly impacted and obscured by this development causing considerable blight in our backyard and affecting our home value. How does Alliance Residential plan to remedy these issues for surrounding homeowners?

What is the need for more multifamily dwellings in the area - I work in multifamily development and currently the occupancy in this neighborhood is far from at capacity.

We will not allow a standard traffic light to be installed at the intersection of Montebello and 7th due to environmental and noise impact issues directly affecting our health and home values. How will over 500 automobiles be managed at this property without causing an impact on the quiet enjoyment of the homeowners and property values?

Lastly, it seems as if there is a considerable amount of concrete and very little landscaping or greenery to enhance the 7th street facade - how does Alliance Residential plan to improve this aspect of the design and avoid building another cookie-cutter multi-family development for short-term dwellers?

Thank you,

Marlana Murdock

Good day -

- I have concerns regarding the proposed apartment complex on 7th Street (between Montebello and Palo Verde, South of Bethany Home).
- The zoning sign states 268 apartments are proposed. This means about 400 parking spaces are required. I would like to see the current barrier to 8th Place be left intact. This would prevent entry/exit from the property from 8th Place as it is now.
- 8th Place is an older narrow street with -five- apartment complexes on the block now. There is insufficient parking on the street today, as evidenced by the number of cars parked on the curbs on any given day. The loss of any parking would magnify parking problems beyond those existing today.
- Next would be the inclusion of a new Verizon cell tower on the proposed apartment property. Verizon has promised a new tower for this area for years. Verizon has referred to the area as a 'cell hole' to me for those years (poor service is well known here). Considering the recent denial of a new Verizon cell tower at 3rd St & Bethany, this would benefit the entire area with no harm to the proposed complex.
- I have lived in the area since 1979, and on this street since 1986.
- If you have any questions, fell free to contact me at your convenience.

Thank you

.

Good morning Sophia -

Mary Crozier forwarded to me your reply to the question of why the building at 5727 N 7th St is 4 stories high. Could you give me information about the text amendment that changed the allowable height from 4 stories to 2 stories or 30 feet? What was the text amendment number and date of the council meeting during which the TA was approved? I'll be happy to submit a PRR but I really don't know what date range to include in the PRR.

Thanks in advance for any information you can provide.

Subject: RE: Quick question
Attachments: Ordinance G-3140.pdf; 1988 Zoning Ordinance as Amended 8 31 1988.pdf

Good afternoon Mary,

I looked through our historical Zoning Ordinances and was able to determine when the height restriction in the C-2 district was modified. As I stated in a previous email, the height restriction was 4 stories and 48 feet in the 1980 Zoning Ordinance. This standard stayed the same until 1988, when it was modified to 2 stories and 30 feet UNLESS the structure was:

1. In a core area as defined in the General Plan 2. Was along Central Avenue between Camelback Road and Harrison Street, or 3. Was on a property that was rezoned prior to June 15, 1988 and was subject to a City Council stipulated site plan.

If a property met one of these three criteria, it could request to have a height of 4 stories and 56 feet. Please see the attached excerpt. This change was done through Text Amendment No. Z-TA-1-88, and was approved by the City Council on June 15, 1988 with Ordinance G-3140 (attached). This is fairly consistent with today's Zoning Ordinance, which permits a height up to 56 feet in the C-2 district, subject to a Height Waiver rezoning request, and subject to the same three criteria listed above. If you look in the text in G-3140, the following statement was added to the beginning of the Yard, Height and Area Requirements for the district:

"To protect surrounding neighborhoods and preserve the public welfare, standards are herein established for yard, height and area requirements to provide an appropriate transition between commercial uses and adjoining neighborhoods. In recognition of the goals contained in the General Plan for uses and intensities within core areas, greater heights and intensities are herein encouraged."

Please let me know if you have additional questions.

Best regards,

Sofia Mastikhina, CNU-A

Sofia,

I'm sorry for giving you additional work. We are working with the developer to come up with the best design for a potential multi-family complex on 7th St. Since it will be the first one north of Missouri we really want it to be spectacular and enhance the area.

Again, I am so grateful.

>> It looks like the building was built some time in late 1983, early 1984. The site plan for the 4-story office building was approved on 8/16/83 (see attached), which means that the development of the site was subject to the Zoning Ordinance from that year. At the time, the most recent Zoning Ordinance was the 1980 version, which allowed a building height of 4 stories and 48 feet (see excerpt attached) in the C-2 district. Now it is considered a legal nonconforming structure as the height regulations for this district have changed, as you noted below, to a maximum of 2 stories and 30 feet.

Hi Megan -
Thank you for replying to my question.

To clarify, a developer of a 16 unit multi-family community is currently planning to use City collection (not sure if it's trash or recycling) one day a week with residents putting 16 containers on the street between the curb and a bike lane. Trash or recycling (whatever the City isn't collecting) will be collected by a contracted service on another day resulting in 16 containers being on the street twice every week.

We are asking them to use a community dumpster with contracted collection as do all of the other multi-family communities of similar size (fewer than 30 units) on that block of Maryland. We were told by the developers this is not possible because the trucks aren't allowed to back up. I found that questionable. There is not a current site plan that shows where a trash compound would be located. Attached is a preliminary site plan that does not include a trash compound. We think a compound would have the least impact on established residential use if it were located in the north-east corner of the property but that is farthest away from ingress/egress to the street.

Does the 50 foot restriction on backing up apply to commercial waste management providers as well as to City vehicles?

Subject: Z-69-20

Hi Sofia-

Hopefully your day is going well.

We have been in discussion with the applicants of case Z-69-20 and a question came up about trash collection. The solid waste department has answered a couple of questions but there is one that might fall under P&D.

The neighborhood would prefer that the development have a community trash compound with contracted service. Is there any code, ordinance, resolution, policy, interpretation, or guideline that would prevent a contracted trash collection service from backing up the truck after collecting the trash?

Thanks in advance for your help.

Broadstone on 7th Z65-20N

- A project property
- B additional apts on property
- C added parcel to project property
- D apartments w parking
- E rehab facility w parking
- F thrift store
- G apartments with parking
- H vacant commercial
- I commercial / bar
- J multiple commercial
- K apartments & homes
- L garden / barrier

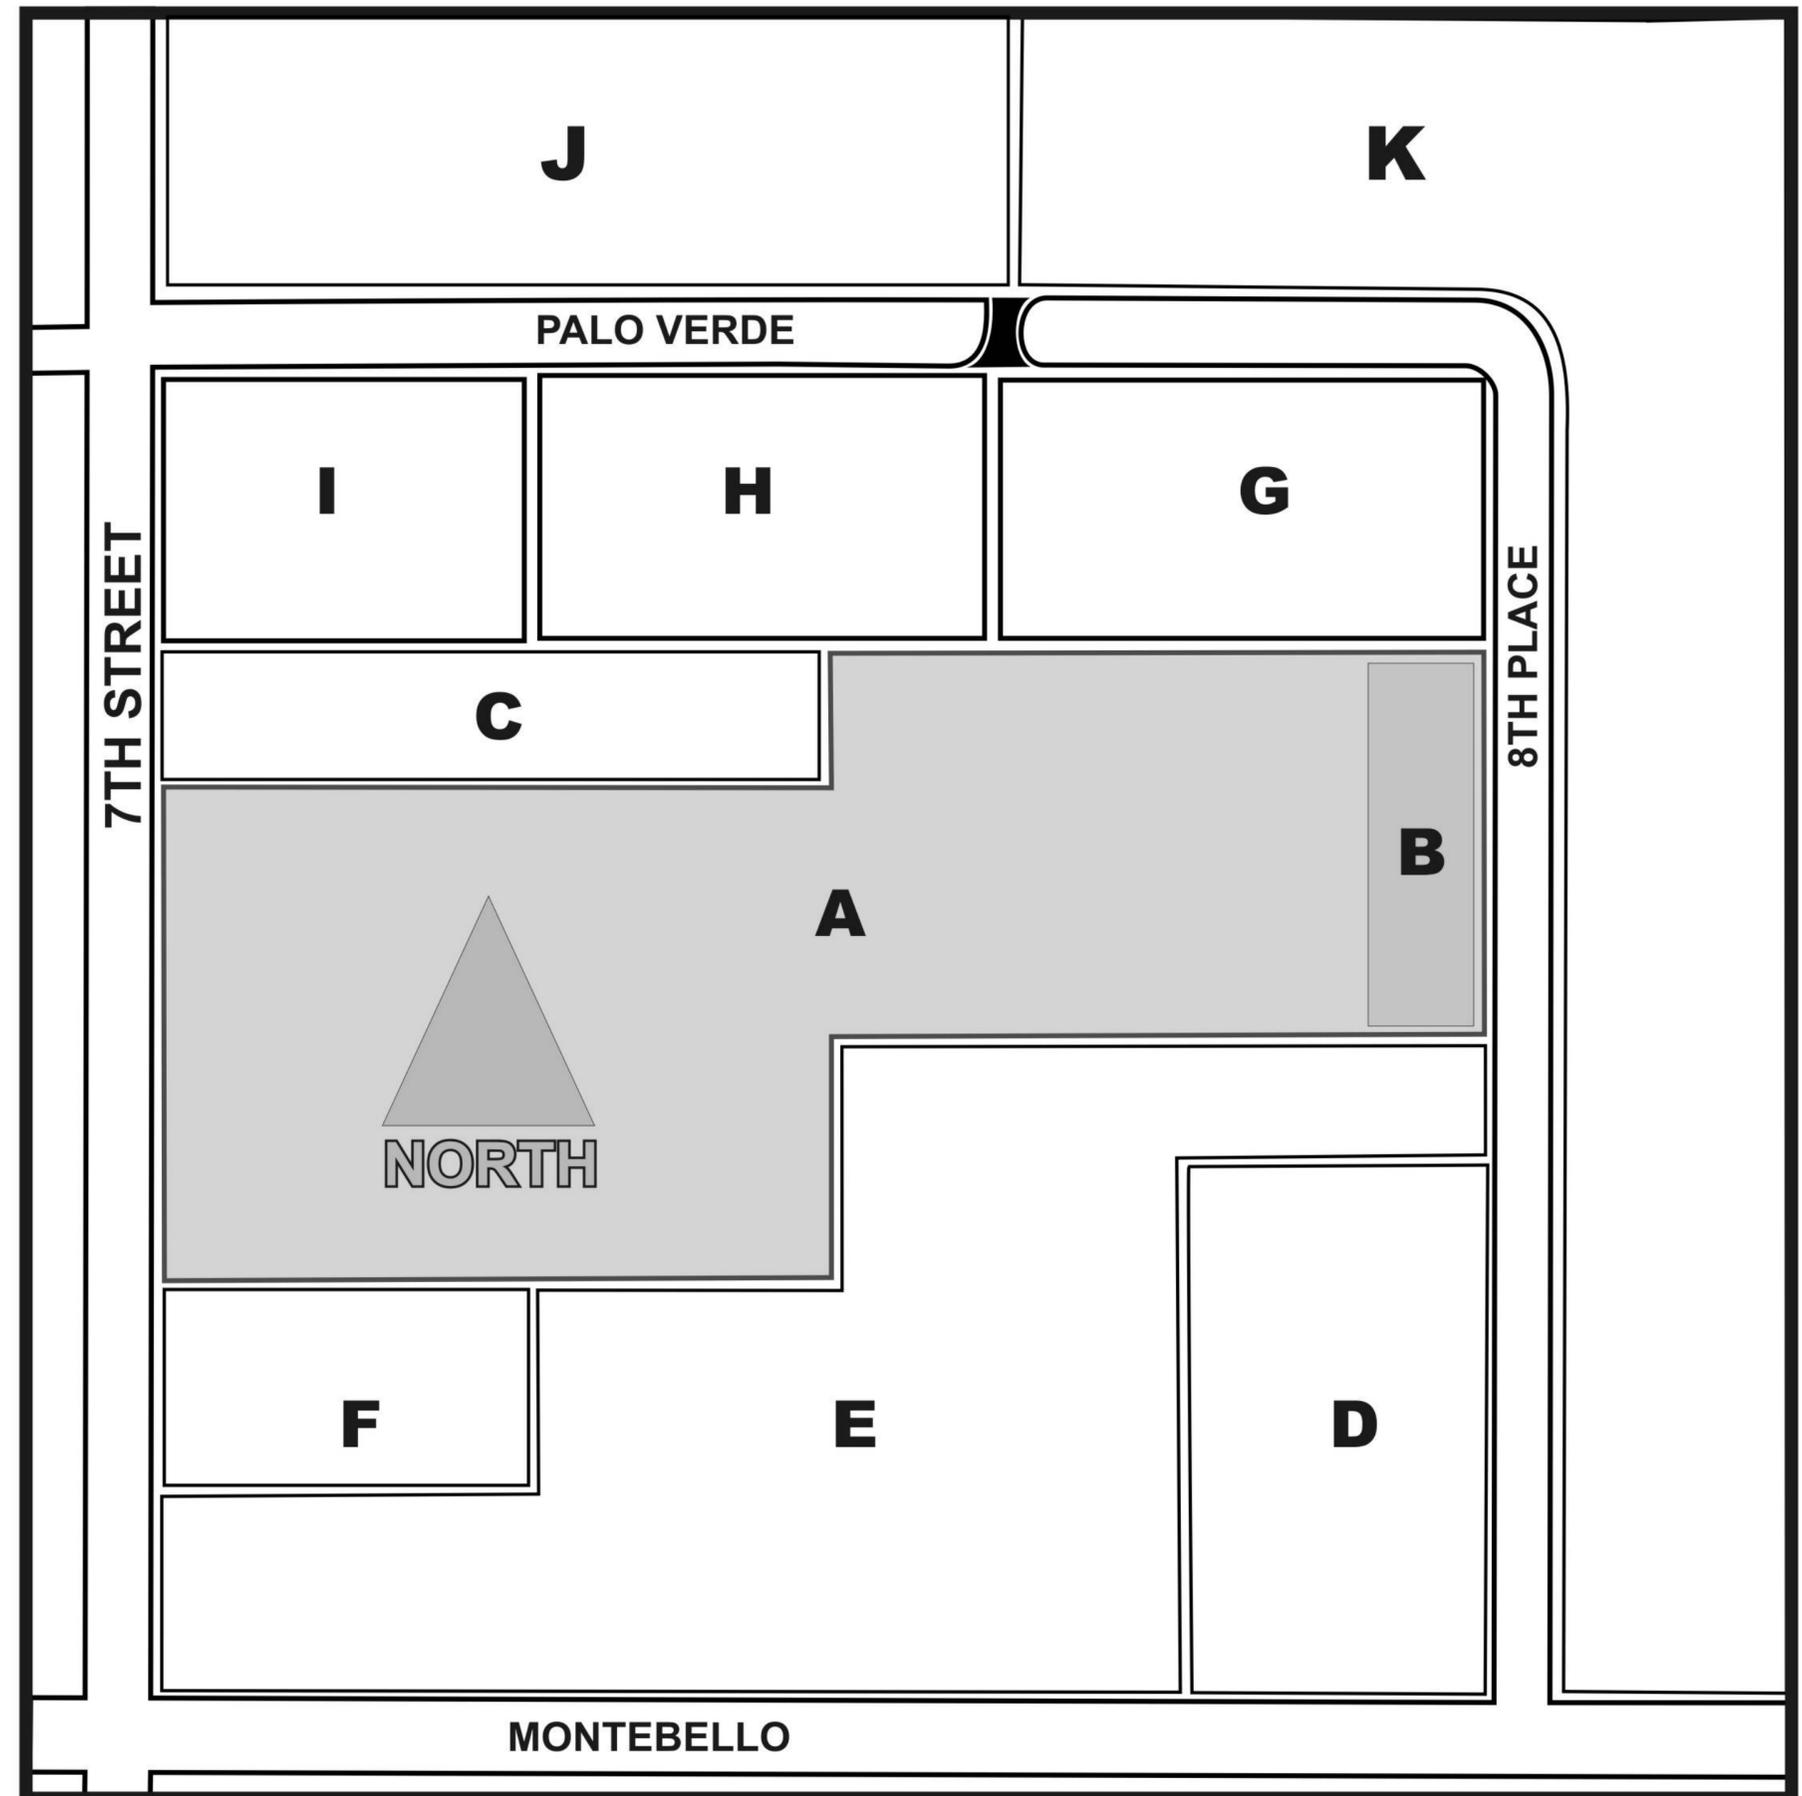

Parcel A - reduce to 4 story - increase parking to a minimum of 1.7 spaces per bedroom. Phoenix is noted as one of the cities experiencing a dramatic increase in 'roomates' sharing living space. Considering the area and rents, any parking must address this change.

Require contact with Verizon requesting a new cell tower to be constructed on the property. This would enhance the project in an area Verizon has repeatedly reports to be a cell hole with poor access to cellular signals.

Parcel B - of major concern. At the least it needs to be turned so as to allow access from within the project. No access to 8th Place at all. Allowing construction as shown would remove ALL remaining parking on the west curb on 8th Place. This is an old residential city street which is already too narrow by a minimum of 15ft.

Parcel C - I was told it has been added to the project. Unknown. If added, appears to have no effect if all other concerns are addressed.

Additional: Make Palo Verde 'not a through street' by planting a garden/barrier on the street at the wall of the apartments to the North. This retains full access to all commercial businesses on both sides of Palo Verde and the residential nature of 8th Place is also retained.

Follow Up Flag: Follow up
Flag Status: Flagged

Good day Sofia -

- I've had an opportunity to look over the new narrative you referred me to (and the company website at: www.broadstoneon7th.com). I do believe it is a real disservice to the public to remove the first filing versus leaving each filing in place, either numbered or dated. It appears this entire project is still in a design phase so seeing each filing becomes even more important.

- I did have a chance to look over the Avery labels purporting to represent all those supposedly contacted. My landlord is there and he said he was never contacted. None of us as tenants were contacted. The apartment complex directly across 8th Place from the project has 33 units - while I did not read every label, it does not appear that any of those residents were contacted.

- Our greatest concern is traffic and parking on 8th Pl. The street will lose 100% of parking on the West side of 8th Pl if the townhomes are allowed to be constructed facing 8th Pl. The street is routinely packed with residents vehicles. The street itself is far too narrow by a minimum of 15 feet in width, in my estimation. Using the standard of 7 and 7 for parking and 12 and 12 for driving, for a total of 38 feet in width from curb to curb, which are marginal figures for safety of residents and vehicles alike. It needs to remain as it is now as the width was permitted to be from many years ago, with no way to widen the street being available.

- The 27 foot height of the proposed townhomes facing 8th Pl is completely out of character of the entire nearby area. There are no other multi-story structures nearby. These townhomes need to face into the subject property and reduced in height if they are to be constructed at all.

- Considering the number of residents expected to live here, and the traffic on 7th Street, it is expected many of those exiting the project will elect to turn to the North. Many will then turn on to Palo Verde and then 8th Pl to reach Montebello then on to 10th and 12th Streets. There is no traffic control at Montebello and 7th St. This again increases the risk to residents and vehicles of those living on 8th Place.

- A far better solution is to block Palo Verde at a line extended South from the West wall of the townhomes to the North of our neighborhood (8th Pl does not go through to the North from Palo Verde). I've seen this 'no through traffic' solution done in a variety of places here in Phoenix over the years.

- This solution is inexpensive, maintains full access to all commercial business in the area on both sides of Palo Verde, and provides the residents living on 8th Place a measure of increased safety as well. Those departing the Broadstone on 7th project can easily go up to Bethany Home.

- These next thoughts are interior items and of less interest to residents of 8th Pl overall but raise the question of how this project is being handled by the City of Phoenix. Number of parking spaces seems quite low. No mention of the size of individual spaces is found. With a CoP space of 9.5 ft by 18 ft - I've seen far too many parking areas where spaces have been made narrower - risking my vehicle and personal safety. What are these spaces to be?

- I looked online and find quite a few articles about the increase in 'roommates' in living situations where rents have increased. Phoenix is said to be among the top cities where this is happening. I personally have known several non-couples sharing a studio space. This calls into question the number of spaces allotted for parking. This number needs to be a minimum of 1.7 / 1.8 spaces - per bed.

- On the current posted narrative there are only four handicapped parking spaces shown on this entire project. The State of Arizona had released the information (two years ago) that Arizona Handicapped placards had more than doubled since 2010. I see many places that have not addressed this lack of parking (Fry's grocery at 20th St being a great example as this store will be one used by residents if this project). I drive a larger van as my mobility scooter is in the back. I do not see the CoP enforcing any parking requirements anywhere on this issue, number of HC spaces, the size of spaces, or the overall number spaces in parking areas.

- I hope my comments are clear and consistent with the previous sketch I provided. If there are any questions, please feel free to contact me at your convenience.

Thank you.

Good day Sofia -

- Thanks for the info. If there is anyone else I should contact - or you recommend contact me - please feel free to do so.

- Apparently the change to the street from a 'through street' as it is now, to 'not a through street' might benefit from an explanation by the general way I submitted it. I'm happy to speak with whomever you feel is appropriate.

- My real concerns are with the project near me and how it affects the neighborhood. These are primarily the traffic, parking, and safety impact. As such, contacting the property owners only and not requiring some 'blanket' notification of residents - the ones who actually live in the area and are directly impacted by any project - seems to ignore residents automatically versus including all those whose living situation and even safety are being affected. Property owners would benefit as well as a change might make that property less desirable to tenants, buyers and customers when commercial property is involved. (The townhomes on 8th Place height being out of scale as the -only- two-story structures in the area is also a real concern, as I mentioned.)

- Some form of notification needs to be implemented by address versus only by property ownership, which is exactly how we were left out of the process.

- How does this change get implemented? Who needs contacting to get this done?

- Next would be in regard to the posting of the narratives and everything else filed that applies to any particular project. No filing should ever be removed. The public's interests in what is proposed - including changes is critical for any number of reasons. I see the new narrative on Broadstone on 7th refers to the original filing, which was removed, so no way to examine it after the removal. This seems like an extraordinarily easy change to make. Policy? or ??

- How does this change get implemented?

- Here's a little oddity to bring a smile. Every once in awhile I still get mail with my address -number- but the street portion as on 'Richland' versus 8th Pl. This is the name of the street South of Thomas. Odd, makes me wonder if the post office, or City keeps old records as reference. Similar to 8th Place NOT being a through street North of Palo Verde as shown on Google maps and elsewhere (blocked by gates).

- Thanks again, keep me in the loop.

Good day Sofia -

- Thanks you for the info - I am pleased to see others see issues with the townhomes on 8th Place.
- Has anything been done regarding the expected increase in traffic on 8th Place from the apartments themselves. Considering where the access is to the project, on 7th Street, as well as the volume of traffic on 7th Street, and where those exiting the new complex will go.
- The likely, easiest, path is what is causing our concerns over many more vehicles turning from 7th Street on to Palo Verde and down 8th Place. With the narrow width of 8th Place, and increase in traffic of any volume will create other problems and increase risks to the safety of residents.
- We already see too many who use this path for unknown reasons, but at times traffic stopped at Montebello is backed up all the way to the corner of Palo Verde (and there is no stop sign at Montebello for 8th Place). The traffic increases on 8th Place and on Montebello occur at the same times. There is a number of vehicles parked on Montebello every day (restaurant employee parking for Mora Italian at 7th St & Montebello) which contributes to visibility issues. When there have been accidents on 7th Street the volume of cars on both Montebello and 8th Place increases even higher.
- 8th Place is already too narrow for vehicles to comfortably pass by one another when legally parked vehicles are present. School buses also use 8th Place every school day.
- The adjustment on Palo Verde by the construction of a barrier in line with the west wall of the large townhome complex (Bethany to the south, to Palo Verde) still seems to be the least disruptive to all commercial concerns on both sides of Palo Verde. It could be changed to one-way out from 8th Place similar to streets off of Central into the neighborhoods.
- While that does not reduce the traffic as much as the preferred choice of a barrier, it would help some. This also preserves the residential nature of 8th Place as well as increase the safety to residents by limiting most traffic to residents of the street.
- Thank you again - keep me updated.

Good day Sofia -

- Thanks for the update. Not posted as of this moment - but I'm watching for it.

- As for the public access page. I disagree completely that it would make it more difficult to navigate. As it is now, it is pretty much a good example of difficult to locate any info one is interested in. Funny thing - this is an example of why I was requested to participate in the creation of the original databases for: Our Superior Court, Justice Courts, Sec of State, Corp Comm over about 25 years ago. I've been asked to clarify and contribute language to proposed laws for our legislature too. I've created over 2,000 web pages - with the focus being on information versus entertainment. I began working in 'information' over 50 years ago in several fields, and that is still of great interest to me - how best to communicate with a particular group or industry.

- Over 50% of the web work I've done has been re-do work. I've come to think of the difference in attitude and ability as being one of training and education. Most websites (and informational pages) are today being created by 'mechanics' (those who can create the page, operate the software, but have no awareness of 'communications' or any real breadth of experience with various industries and their populations - they are quite simply not 'communicators' at all. These pages reflect this, for no good reason.

- This page is a perfect example. 'Indexed' by the Z-number - how would any person, any member of the public know this number? and is therefore shut out - even after learning the name - and only then learning that Z-number. This page should be indexed alphabetically correct, allowing any person in the public to find a project easily by simply using the information in public releases and news stories, which still meets industry needs.

- Having spoken with several lawyers ... Once the filing has been made it becomes a part of the public record and removing it from the public view might actually be considered a violation of Arizona's public records laws. While it might be accessible on request - how would anyone know to make a request for it? Simply keeping it visible in the list and noted in some fashion, #1 etc, or some similar consistent notation solves it for everyone involved, as well as the law.

- Overall, virtually every government public access page I have had the need to access is in similar condition - poorly designed and assembled. There is a huge amount of waste in evidence on government pages - huge amounts of wasted (and expensive) creation time and taxpayer's money - while not actually serving the public needs.

- I will happily attend ANY meeting or assessment as might happen. Fat chance today.

.

- Okay, on to the street issue. I realized that if 8th/Palo Verde were simply blocked off / turned into a 'cul-de-sac' essentially - the school buses that come through here would be forced to back up (we do have kids, bicyclists, and pedestrians - thus the safety issue of all the increase in traffic on 8th Place) - a situation to be avoided at all costs. So I've attached a photo I took yesterday showing what seems to resolve the access issue

on Palo Verde (still maintaining all commercial access) and still allows the school buses their multiple daily trips to continue their exit to 7th St. Preventing all the likely increase in traffic and accompanying increased risk from those leaving Broadstone on 7th remains the goal.

- The photo shows a tactic that is being used more frequently in these situations as an alternative to completely blocking the street to 'through' traffic (as being done off Central South of Thomas Rd). If I recall this was the choice of the City in response to the increased threat of increased traffic. Questions - by all means ask me.

- I'm going to break this here - and will send a second eMail on two issues that have come up during this search for information.

Thanks again.

>
> You are already familiar with the PUD page. There is also a page where we post the staff reports for "regular" rezoning cases (meaning they are rezoning to a standard zoning district, and not creating their own development narrative like a PUD). This page also includes staff reports for General Plan Amendments and Text Amendments. You can find those here: <https://www.phoenix.gov/pdd/planning-zoning/pzservices/pzstaff-reports>.
>
> One of the best tools to explore what developments are going on in the city is our interactive My Community Map. This allows you to navigate a map of the city either by typing in an address or just moving the map with your mouse. You can click on individual properties, and if there is an active zoning case, zoning adjustment case, or building permit on the property, a pop-up will appear with some more information and a link to a summary of the case. You can access this map here: <https://www.phoenix.gov/pdd/mycommunitymap>
>
> Finally, you look to see if there are any active building permits on a property with our Permit Search here: <https://apps-secure.phoenix.gov/PDD/Search/Permits>

Subject: traffic on 8th Pl ...

Follow Up Flag: Follow up
Flag Status: Flagged

Good day Sofia -

- Thanks for the information.

- The sign example I sent along is just to show how the City has chosen to deal with keeping the problems of increases in traffic volume down in areas where it presents an increase in problems and associated risk to residents safety and peace. I realize there is no requirement for this change, but ... I would like to see support for the idea from the City and developer based on their awareness of this situation and the willingness to address it.

- Our concerns are for an increased volume of traffic on 8th Pl come from our view that -many- of the vehicles departing the Broadstone property will turn to the North because of traffic on 7th St (what the City and State have both said is 'the most travelled street in Arizona - between Indian School and Glendale particularly).

- These drivers will choose to turn on to Palo Verde (in search of a way to get to SB 7th St) and in doing so will dramatically increase the volume of cars (and generally increase the danger to parked vehicles, bicyclists, children, and pedestrians) using Palo Verde and 8th Pl as the easiest route away from the Broadstone property for many drivers. The width of 8th Place contributes to these concerns.

- The six townhomes were commented on by you previously (as a bad idea).

- The removal of any filing from the will leave the public without any knowledge those filings exist. The easiest and most obvious solution is to simply leave them visible on the public access page.

Thanks.

.

> I will pass your message regarding the web page to the management team. Although only the most recent narrative is posted on the website, all versions continue to be public record and can be requested through a Public Records Request. This can be done directly through the Village Planner or through the website here: <https://www.phoenix.gov/pio/public-records-request>.

>

> Thank you for your suggestion regarding the sign to discourage through traffic, and I will forward it to the Street Transportation Department. It is my understanding that, at this time, there are no requirements from the city for the developer to install such a sign on Palo Verde, as the main garage entry for the development will be

off of 7th Street. The PUD narrative restricts access from 8th Place, so that the main garage cannot be accessed from this street. The only vehicular movement on 8th Place related to this development will be for the 6 individual townhome units, and I am not sure if this level of traffic would warrant a sign to be installed. However, I am not a traffic engineer. I will say that one of staff's stipulations for this case will be to submit a Traffic Impact Statement for review before any plans are approved. This will help the department determine if any other traffic mitigating features will be needed. These kinds of details are typically worked out at the plan review stage, after the zoning is in place.

>
> - As for the public access page. I disagree completely that it would make it more difficult to navigate. As it is now, it is pretty much a good example of difficult to locate any info one is interested in. Funny thing - this is an example of why I was requested to participate in the creation of the original databases for: Our Superior Court, Justice Courts, Sec of State, Corp Comm over about 25 years ago. I've been asked to clarify and contribute language to proposed laws for our legislature too. I've created over 2,000 web pages - with the focus being on information versus entertainment. I began working in 'information' over 50 years ago in several fields, and that is still of great interest to me - how best to communicate with a particular group or industry.

>
> - Over 50% of the web work I've done has been re-do work. I've come to think of the difference in attitude and ability as being one of training and education. Most websites (and informational pages) are today being created by 'mechanics' (those who can create the page, operate the software, but have no awareness of 'communications' or any real breadth of experience with various industries and their populations - they are quite simply not 'communicators' at all. These pages reflect this, for no good reason.

>
> - This page is a perfect example. 'Indexed' by the Z-number - how would any person, any member of the public know this number? and is therefore shut out - even after learning the name - and only then learning that Z-number. This page should be indexed alphabetically correct, allowing any person in the public to find a project easily by simply using the information in public releases and news stories, which still meets industry needs.

>
> - Having spoken with several lawyers ... Once the filing has been made it becomes a part of the public record and removing it from the public view might actually be considered a violation of Arizona's public records laws. While it might be accessible on request - how would anyone know to make a request for it? Simply keeping it

visible in the list and noted in some fashion, #1 etc, or some similar consistent notation solves it for everyone involved, as well as the law.

>

> - Overall, virtually every government public access page I have had the need to access is in similar condition - poorly designed and assembled. There is a huge amount of waste in evidence on government pages - huge amounts of wasted (and expensive) creation time and taxpayer's money - while not actually serving the public needs.

>

> - I will happily attend ANY meeting or assessment as might happen. Fat chance today.

>

> .

>

> - Okay, on to the street issue. I realized that if 8th/Palo Verde were simply blocked off / turned into a 'cul-de-sac' essentially - the school buses that come through here would be forced to back up (we do have kids, bicyclists, and pedestrians - thus the safety issue of all the increase in traffic on 8th Place) - a situation to be avoided at all costs. So I've attached a photo I took yesterday showing what seems to resolve the access issue on Palo Verde (still maintaining all commercial access) and still allows the school buses their multiple daily trips to continue their exit to 7th St. Preventing all the likely increase in traffic and accompanying increased risk from those leaving Broadstone on 7th remains the goal.

>

> - The photo shows a tactic that is being used more frequently in these situations as an alternative to completely blocking the street to 'through' traffic (as being done off Central South of Thomas Rd). If I recall this was the choice of the City in response to the increased threat of increased traffic. Questions - by all means ask me.

>>

>> I just wanted to provide you with an update regarding our last correspondence. I spoke with my supervisors and relayed your comments about the PUD projects page, and they indicated that they'd be open to your suggestion. However, given the number of drafts that typically come in for these cases, it might make the page more difficult to navigate. All development narrative drafts are part of the public record and can be provided to members of the public upon request.

>>

>> Also, we have received a resubmittal for the Broadstone on 7th PUD, which will be uploaded to the PUD webpage on Monday morning. I just sent in the request to upload this morning, as the submittal came in at the end of the day yesterday, but I doubt anyone is checking their emails on a Saturday 😊

We have seen a large influx of entitlement cases come in, so I'm sure she is just working on getting through all of them. I sent her a reminder today and will try to touch base tomorrow and provide you with further information.
